## *Foundation Information:*

Andrew J. Cohen lost his 38-year-old sister, Marjorie, to breast cancer in 2001, only one year after his 59-year-old father died of colon cancer. The family learned, through the illness, that Marjorie carried a genetic mutation that dramatically increased her risk of breast cancer. Andy, his family, and Marjie's friends established the Marjorie B. Cohen Foundation which funds and supports cancer genetics research and education as well as outreach into the community.
